

Directions for use Orange/Lemon

1. Soils with high active limestone content >3,6 % and CPI>36

Phase growth	Nano.T [®] Fe	Calcito
Pre-blossoming	50 g/plant	50-60 g/plant
Post-fruit set/fruit swelling	50 g/plant	50-60 g/ plant

For young trees, halve the doses - it is recommended to alternate the applications of the two products

2. Soils with low-medium active limestone content <3,6% and low CPI<36

Phase growth	Nano.T [®] Fe	Calcito
Prefioritura	30 g/plant	30-50 g/plant
Post-fruit set/fruit swelling	30 g/plant	30-50 g/plant

For young trees, apply 2/3 of the dose - it is recommended to alternate the applications of the two products

Apply **Nano.T[®] Fe** and **Calcito** in **FERTIGATION**
Apply at least 10-20 mm of water

Grow well to eat better
